REAL TIME, CONTINUOUS PULSATION MONITORING**

 **BECO**  
DAIRY AUTOMATION INC.

## 24/7 PULSATION MONITORING

IS TESTING YOUR MILKING SYSTEM  
ONCE A MONTH, "GOOD ENOUGH?"

### PULSNEXUS MONITORS

- Hoses that fall off
- Holes in Air Tubes
- Cracked, or split liners
- Plugged Hoses
- Dirty Filters in fresh air system
- Malfunctioning vacuum regular
- Dirty or faulty pulsator

### 24/7 PULSATION MONITORING

- Alarm diagnostics, not just a red light
- Easily adapts to all systems
- Ability to control the pulsator
- Monitors parlor performance
- Sends alerts to Dairyman automatically
- Helps manage employees

ONE BAD PULSATOR  
WILL PUT A LOT  
OF COWS AT RISK
