**Insight**  
**WIRELESS MILK METER**

# Insight

**WIRELESS  
FREE MILK AND AIR FLOW  
EASY INSTALLATION**

## WIRELESS

The Insight is the first milk meter that is completely wireless. The so-called 'SmartFloat' inside the device and the Processing unit form the intelligent brains and the heart of the system. They combine advanced technologies that make power supply, the measuring principle and data communication completely wireless. As a result, the Insight excels in cost, maintenance, efficiency, and ease and speed of installation. It eliminates malfunctioning due to poor or faulty wiring. In combination with the elegance of the device, it also benefits the appearance of the milking installation

## ADD INTELLIGENCE AND MILKING DATA TO YOUR PARLOR

The Insight Milk meter ensures a continuous and completely free milk and air flow. Thanks to advanced technologies used for power management, data communication and recording, it is the first milk meter that is completely wireless.

The Insight records the milk yields and flow rate of individual cows during each milking with the highest accuracy. It empowers dairy farmers with operational and strategic performance insights and controls various automated processes in the milking parlor.
